

TITIRANGI Smiles

Welcome to the Titirangi Smiles Tribe

As you are a new patient to our clinic it is important that you understand recommended dental procedures.

The Dental Hygienist you are seeing is a registered professional trained to help you to improve and maintain your oral health as part of your overall general health.

It is also recommended that you see a dentist at least every twelve months for an examination and overall dental care plan.

I have read and understand the above.

(Patient's name)

Signed

I do have a regular dentist.

My regular dentist is

I do not have a regular dentist.

I would like you to recommend a dentist. Yes / No
